Andrei-Cosmin Tutea

Network & Infrastructure Support · Cisco · Linux · Windows Server

Northampton, UK · linkedin.com/in/cosmin-tutea-202876a5 · github.com/Ioksan

PROFILE

Infrastructure and support professional completing an FdSc in Computing (Level 5) in November 2026. I built and ran a Cisco and Linux internet service provider with 15 staff and over 500 subscribers, and provided 24/7 hardware, software and on-site support for banking, government and energy clients at an IBM authorised dealer. I later led sales, technical design and ISO certification for a Daikin authorised distributor, managing a team of 10 and projects worth up to €2 million. I am now seeking a first- or second-line network or infrastructure support role, with a path into Microsoft cloud administration (Azure).

TECHNICAL SKILLS

- **Networking:** Cisco routers and switches, IP addressing and routing, LAN/WAN, DNS, DHCP, firewall (iptables), web proxy (Squid), PPPoE/RADIUS subscriber authentication, network fault diagnosis
- **Systems:** Linux server administration, Windows Server (2000, 2003), Novell NetWare, server, desktop and notebook hardware repair, ATM maintenance
- **Data and machine learning:** pandas, NumPy, scikit-learn, XGBoost, OpenCV, time-series evaluation, bootstrap intervals, Jupyter, Streamlit
- **Cloud and data:** Microsoft Azure (AZ-900 planned), SQL, IBM Data Science Professional Certificate (in progress)
- **Programming:** Python, SQL, Java, TypeScript, React Native, HTML, CSS, JavaScript, Git and GitHub
- **Service and process:** SLA-based support, remote and on-site troubleshooting, technical documentation, ISO 9001, ISO 14001 and OHSAS 18001 procedures, tender preparation
- **Tools:** Microlise telematics, CRM systems, Daikin VRV and Altherma design software

PROJECTS

When the Twin Drifts — Sensor drift and model choice in urban air-quality digital twins

Unpublished coursework paper · CMP211 Intelligent Systems, FdSc Computing, ESL / NCG · 2026 · Supervisor: Oritsetimeyin Edema

- Analysed one year of co-located low-cost sensor and certified-analyser NO2 data from the public UCI Air Quality dataset (7,393 modelled hourly rows) in Python with pandas and scikit-learn.
- Found that the low-cost NO2 sensor's correlation with its reference fell from 0.84 (March 2004) to 0.45 (November 2004), and its calibration slope from 7.2 to about 2.5–3.0.
- Compared linear regression and random forest under random and chronological 70/30 splits. On that split, chronological testing cost 14.4–17.3 µg/m³ of RMSE, while the random forest gained 3.1 µg/m³ over linear regression.
- Revised the paper after a supervisor review: added rolling-origin windows, bootstrap intervals, an alert-threshold test and a single reproducible script.

WorkPayTracker — Android app · React Native, Expo, TypeScript · github.com/Ioksan/WorkPayTracker

- Built and released an Android app that logs shifts and estimates gross pay, PAYE, National Insurance, pension and net pay for UK shift workers.
- Validated the pay logic against five real payslips: gross pay matched within £1 and pension to the penny.
- Stores all data on the device with no account or server; JSON export and import for backups.

UK House Price Prediction — Python, scikit-learn, XGBoost, Streamlit · github.com/Ioksan/House_Price_Prediction

- Trained and compared four regression models on 90,000 HM Land Registry sale transactions (2015–2024) using 5-fold cross-validation.
- Removing outliers reduced RMSE from £580,262 to £130,170. XGBoost scored best, narrowly ahead of linear regression (£131,073).
- Built a Streamlit app that returns a price estimate from property details.

Real-time Object Detection — Python, OpenCV, YOLOv8 · github.com/Ioksan/realtime_object_detection

- Built a webcam object detector that runs the YOLOv8 nano model on each frame and draws labelled bounding boxes in real time.

VisionText AI Assistant — Python, Streamlit, Google Gemini API · github.com/Ioksan/First-Chat-Bot

- Built a chat assistant on the Gemini 2.5 Flash model that answers questions about text and uploaded images, with the API key kept out of the repository in a local .env file.

PROFESSIONAL EXPERIENCE

HGV Class 1 Night Driver
Aug 2020 – Present

GXO (formerly Wincanton), Sainsbury's contract · Northampton, UK

Drive Class 1 articulated vehicles on overnight routes between Sainsbury's distribution centres and stores.

- Drive Class 1 (Category C+E) articulated vehicles on night routes serving distribution centres and stores.
- Deliver ambient, chilled and frozen stock to fixed time windows, using tail-lift and dock loading.
- Ranked 23rd in the company for driving style.
- Use Microlise telematics for route information, delivery confirmation and driving performance data.
- Carry out daily walk-round checks, report defects and comply with drivers' hours and digital tachograph rules.
- Work alone at night and resolve problems on the road without on-site support.
- Study for an FdSc in Computing (Level 5) alongside full-time night shifts.

HGV Driver (Class 2)
Feb 2019 – Aug 2020

Wickes · Northampton, UK

Delivered building materials and home improvement products to customers across England from a 15-tonne rigid vehicle.

- Completed around 12 deliveries a day, planning the drop order to meet customer time slots.
- Used a handheld device to manage the delivery schedule and confirm each drop.
- Carried out daily walk-round checks, reported defects and complied with drivers' hours rules.
- Unloaded by hand using safe manual handling techniques and resolved delivery queries face to face.

Sales Manager — HVAC, Heating & Refrigeration
2014 – 2018

Daikin Authorised Distributor · Constanța, Romania

Led sales, technical design and quality management for a Daikin authorised distributor supplying HVAC, heating and refrigeration systems across Romania from branches in Constanța and Bucharest.

- Managed a sales team of 10: set targets, allocated territories and key accounts, and reviewed performance.
- Won and delivered projects worth up to €2 million, with several contracts above €1 million, and monthly sales of several hundred thousand euros.
- Sold Daikin VRV/VRF systems, split and multi-split air conditioning, heat pumps, boilers, central and underfloor heating, chillers and industrial refrigeration.
- Delivered climate control projects for hotels, commercial buildings, industrial sites and private villas, from site survey to handover.
- Produced technical documentation, system designs and specifications using Daikin design software for VRV, Altherma and residential systems.
- Worked with installers, technical teams and suppliers on system sizing, commissioning and after-sales support.
- Prepared and submitted tender bids for public and private contracts, covering technical compliance, pricing and contract terms.
- Built and managed a national network of 50 service and installation partners, including maintenance for fuel station infrastructure.
- Coordinated operations between the Constanța and Bucharest branches.
- Launched online sales on the eMAG marketplace and expanded B2B partnerships into neighbouring markets.
- Managed relationships with Daikin Europe and Daikin Romania, negotiating pricing and maintaining authorised distributor status.
- Led the company through ISO 9001, ISO 14001 and OHSAS 18001 certification, writing procedures and preparing for external audits.

Regional Sales Representative — Pharmaceutical Sector
2008 – 2014

Three pharmaceutical companies · South Romania

Sold OTC, cardiovascular and general medicines to pharmacies and distributors across a seven-county territory.

- Managed a portfolio of over 500 pharmacies, including more than 250 accounts in Constanța county alone.
- Made around 80 customer visits a week, planning routes and call cycles to cover the full territory.
- Grew territory sales several times over and ranked first nationally for sales within the company.
- Negotiated orders, stock levels, discounts and promotional agreements, and opened new accounts.
- Recorded visits, orders and pipeline in internal CRM systems and produced weekly sales reports.
- Monitored competitor products and pricing and worked within pharmaceutical promotion regulations.

Mechanical and Electrical Fitter — Packaging Machinery 2007 – 2008
Industrial machinery manufacturer · Piacenza, Italy

Assembled and tested automated packaging machines for Tetra Pak cartons and plastic bottles.

- Assembled sub-assemblies and complete machines from technical drawings and parts lists.
- Fitted conveyors, motors, gearboxes, pneumatic components and safety guarding.
- Carried out electrical assembly and wiring of machine components.
- Tested complete machines before delivery and corrected faults found during testing.
- Worked to workshop health and safety procedures in an Italian-speaking engineering team.

Owner / Managing Director — IT Services & Internet Service Provider 2003 – 2007
Own business · Constanța, Romania

Founded and ran an IT services company and local internet service provider with 15 staff, supplying broadband to over 500 residential subscribers and 6 business clients on a Cisco and Linux network.

- Designed, built and maintained the ISP network using Cisco routers and switches and Linux servers.
- Configured IP addressing, routing and subscriber connections.
- Ran Linux servers for DNS, DHCP, firewall (iptables), web proxy (Squid), bandwidth control, mail and subscriber authentication (PPPoE/RADIUS).
- Managed the full IT environment for a Mercedes-Benz dealership: internet, internal network, servers, workstations and printers, with on-call support.
- Diagnosed and resolved network faults and outages, supporting customers by phone and on site.
- Led a team of 15 and handled pricing, equipment purchasing, invoicing and supplier relationships.
- Repaired, upgraded and built PCs and installed small office networks for business clients.

IT Specialist 1999 – 2003
IBM authorised dealer · Constanța, Romania

Provided 24/7 support, hardware service and software for corporate and public-sector clients across Romania, including the Romanian Ministry of Finance, Banca Comercială Română (BCR), Lukoil and Petrom.

- Answered the 24/7 support line and resolved faults by phone; when a fault was not fixed within 30 minutes, travelled to site and restored service within six hours.
- Kept Petrom and Lukoil fuel stations trading: restored the link between the station server and the DOMS forecourt controller that collects pump data, and fixed server, POS terminal, printer and network faults.
- Trained at Synergon in Budapest on the fuel-station software; installed, configured, tested and adapted it with Synergon's developers and wrote parts of the code.
- Adapted the POS software to keep it legally certified as fiscal rules changed.
- Cut repeat failures caused by power fluctuations by fitting UPS units and surge protection and raising supply problems with the energy provider.
- Installed, serviced and repaired IBM servers, desktops, ThinkPad notebooks, ATMs, printers and network equipment; installed Windows and Novell NetWare servers.

EDUCATION

FdSc Computing (Level 5) — NCG / Elizabeth School of London, Northampton — Completing Nov 2026

Cert HE in Computing, Level 4 — NCG / Elizabeth School of London, Northampton — 2025 – 2026

BA Business and Management — Romania — 2012 – 2015

Relevant modules: Network Design Fundamentals, Information Systems and Databases, Secure Web Development, Internet of Things, Intelligent Systems.

CERTIFICATIONS

- IBM Certified Service Technician — Servers and Notebooks
- Microsoft certifications — Windows 2000 Server and Windows Server 2003
- Novell certification
- IBM Data Science Professional Certificate — Coursera (in progress)
- Driver CPC (Certificate of Professional Competence)

LANGUAGES AND ADDITIONAL INFORMATION

- **Languages:** Romanian (native), English (fluent), Italian (conversational)
- **Driving licence:** Full UK licence, Category C+E
